

**COOLEST  
PROJECTS**

# *THE WORLD'S LEADING TECHNOLOGY SHOWCASE FOR YOUNG PEOPLE*

Coollest Projects online is a celebration of creativity and innovation where young people up to the age of 18 can showcase what they've made with technology. Young people can make games, animations, websites, apps, hardware projects, Scratch projects, and much more. Coollest Projects online is an opportunity for young people to share their creations with a global audience and learn in a safe and encouraging space online.

## ***ENCOURAGE THEIR CREATIVITY WHEREVER YOU ARE!***

***PROJECT REGISTRATION OPENS 1 FEBRUARY 2021

# HOW TO PARTICIPATE IN COOLEST PROJECTS

1

## IMAGINE

Use our design workbook to help young people brainstorm how they can contribute to their community or express themselves with technology. No idea is too small or too big!

2

## MAKE

Young people can work at home by themselves, or assemble a team of up to five people. We have free step-by-step project resources and code-along live streams to help them throughout.

3

## PRESENT

Young people will learn how to present their ideas — writing a description of their Scratch project, or recording a two-minute video demonstrating their project, to be included in the online showcase gallery. Projects must be presented in English.

4

## REGISTER

You can register projects at [coolestprojects.org](https://coolestprojects.org) until 3 May 2021.

5

## CELEBRATE

See their project among thousands of others in the showcase gallery and join the live online event in June to celebrate the community and find out which projects our world-renowned judges chose as their favourites!

**ALL SKILL LEVELS ARE WELCOME AND ALL TYPES OF PROJECT ARE ENCOURAGED**
